# Chakshit Gaur

New Delhi, India | chakshitgaur25@gmail.com | +91-9896910256 | linkedin.com/in/chakshit-gaur | github.com/ChakshitGaur

## PROFESSIONAL SUMMARY

Python backend developer with 3+ years of experience building APIs, web applications and automation tools. Skilled in Django, REST APIs and SQL, with hands-on experience in machine learning. Has worked in startups, as a freelancer and as an AI/ML engineer, and delivers clean, tested code.

## SKILLS

| | |
|---|---|
| **Languages & Databases** | Python, SQL, Core Java, MySQL, Oracle SQL |
| **Web & Backend** | Django, Django REST Framework, REST APIs |
| **Automation & Data** | Selenium, Web Scraping, Pandas, NumPy, Matplotlib, Power BI |
| **ML & Computer Vision** | Scikit-learn, XGBoost, SHAP, TensorFlow, PyTorch, Computer Vision, OCR, YOLO |
| **Testing, CI/CD & Tools** | pytest, GitHub Actions CI, Docker, Git, GitHub, Streamlit, Jupyter |
| **AI Agents** | Claude Code, Codex, Cursor |

## WORK EXPERIENCE

**Freelancing | Independent, Remote** Feb 2026 – Present

- Worked as a remote Python backend engineer with several companies, including clients based outside India.
- Built and maintained the APIs and backend structure that run and support client dashboards.
- Delivered projects on time, working directly with each client across different time zones.

**Python Developer | Stealth Startup (Full-time)** Jul 2024 – Sep 2025

- Full-time Python developer at a stealth-mode startup, working on the backend of its dashboard product.
- Built backend features and APIs with Python, Django and Django REST Framework, using MySQL and Git.
- Worked in a small, fast-moving team, helping turn early ideas into working features as priorities changed.

**AI/ML Engineer | Isourse Technologies Pvt. Ltd., Delhi** May 2023 – June 2024

- Built the FM Logistics client video system in Python, using OCR and computer vision to synchronise two live-stream videos by timestamp and stitch them into one video.
- Built an applicant tracking system with Selenium that pulls applicant details from LinkedIn into CSV for HR, with Python and SQL storage for 5,000+ applicants; trained HR staff.
- Built an Employee Management System that tracks keyboard activity and idle time to measure productivity, delivered as a standalone executable with documentation and support.

## PROJECTS

**Expense Tracker** Python, Django, SQLite, Chart.js

- Built a multi-user Django app to log and categorise expenses; each user sees only their own data.
- Added a charts dashboard and monthly budgets with progress bars and threshold warnings.
- Built CSV import/export with per-row error reports and 43 automated tests run by GitHub Actions CI.

**Customer Churn Prediction** Python, XGBoost, SHAP, Streamlit, pytest

- End-to-end churn pipeline on 7,043 telecom customers with XGBoost and scikit-learn: PR-AUC 0.671 and 2.9x lift in the top risk decile, beating a logistic regression baseline.
- SHAP explanations, calibrated risk tiers and a cost-based targeting plan (contacting 33% of customers reaches 73% of churners), shipped as a Streamlit dashboard with 80+ pytest tests.

**Multiple Disease Prediction System** Python, Streamlit, Scikit-learn, Pandas, NumPy

- Built a Streamlit app that predicts diabetes, heart disease and Parkinson's disease from medical inputs.
- Trained a separate scikit-learn model per disease (logistic regression, SVM) and loaded them in the app.

**Book Recommendation System** Python, Flask, NumPy, Pandas, Scikit-learn

- Built a Flask app that recommends similar books using collaborative filtering and cosine similarity.
- Preprocessed book-rating data with NumPy, Pandas and Scikit-learn; added an HTML front end and a Procfile.

## EDUCATION

**B.Tech, Computer Science and Engineering – 78%** 2019 – 2023
*D.P.G Institute of Technology and Management, Gurugram*

**12th Standard – 89%** 2018
*Shri Krishna Parnami Sr. Sec. School, Karnal*

**10th Standard – 9.0/10 CGPA** 2016
*V.P International School, Karnal*
